# iOS Mobile Version

MT4 User Guide

# Introduction

MetaTrader 4 (MT4) is a powerful and user-friendly trading platform designed for Forex, CFD, and futures markets. It provides traders with real-time market quotes, advanced charting tools, and seamless order execution. With superior performance, reliability, and a range of built-in features, MT4 stands out as one of the most widely used trading platforms. This guide by CG FinTech will walk you through the essential steps to efficiently operate the MT4 mobile version for iOS devices.

## How to Download and Install MT4?

1. Open the Apple App store on your phone.
2. Search for "MT4" or "Metatrader 4".
3. Click on "Get" to install the application on your phone.

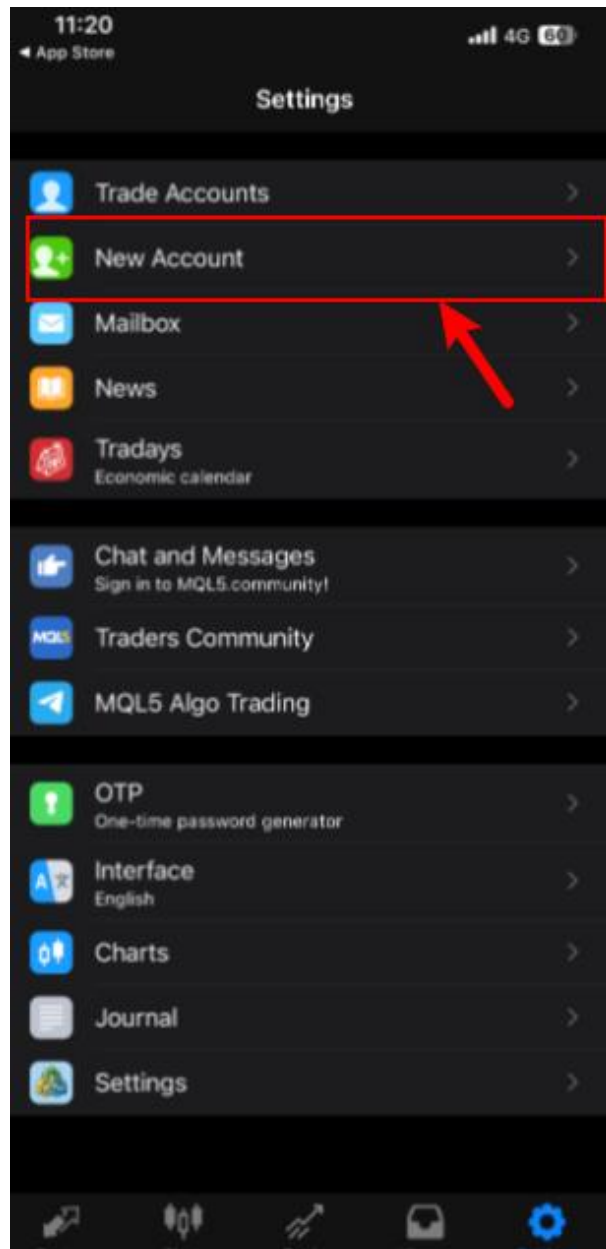

## Logging into Your Trading Account

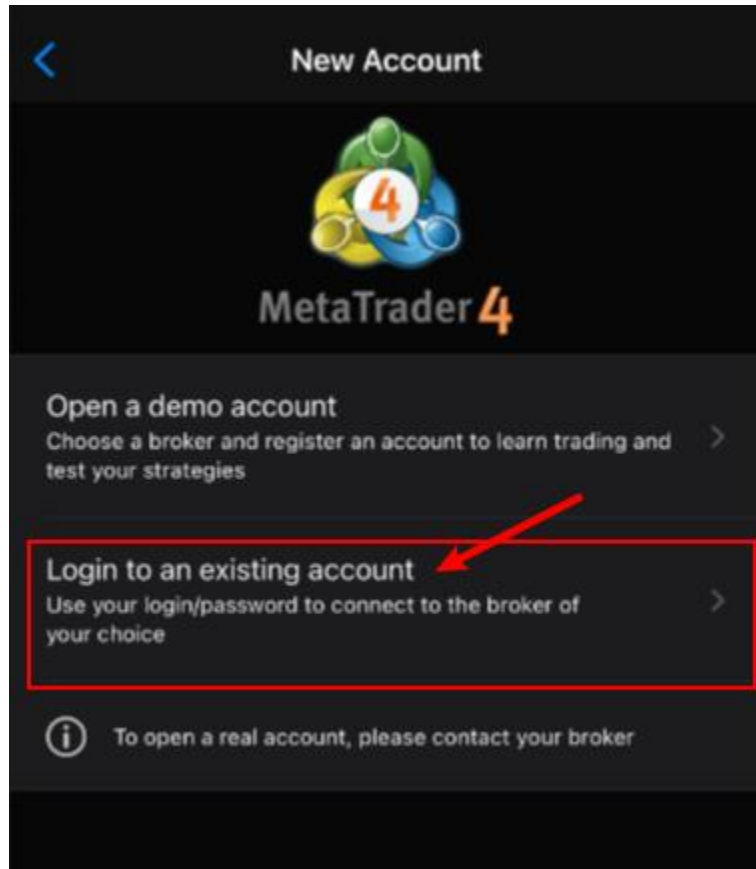

1. After installing the MT4 mobile app, open it, and you will see the main screen. Tap on "**Settings**" at the bottom right corner to access the login page.

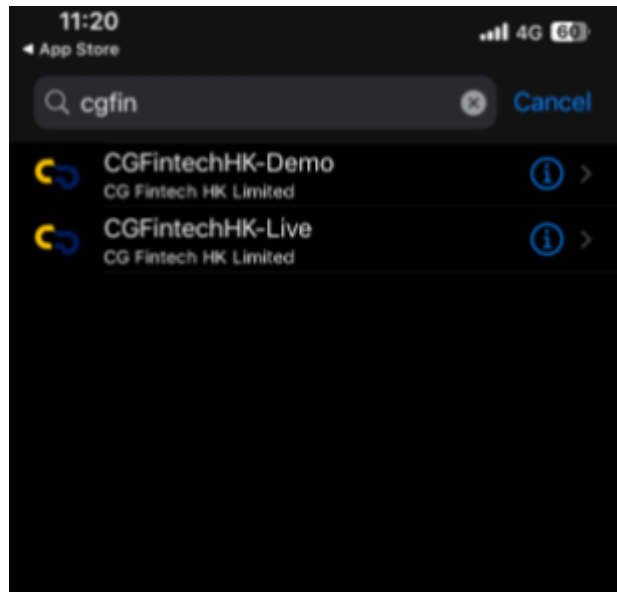

2. After selecting settings, the following screen will appear. Click on "New account" to Create a new account.

3. If you already have a real account, select **“Login to an Existing account”**

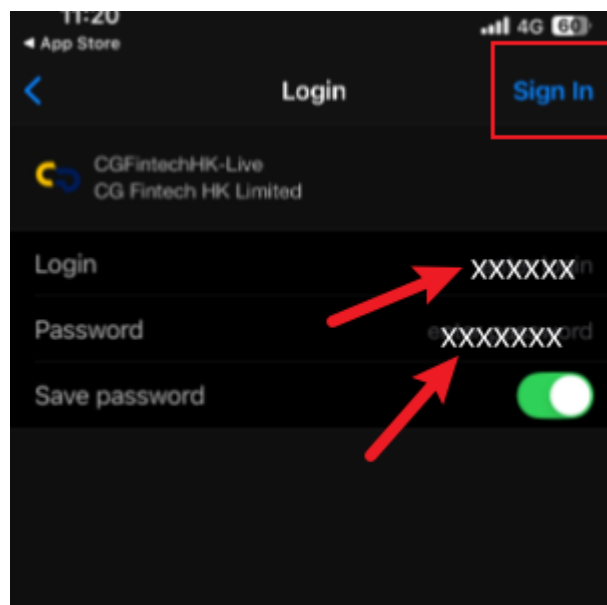

4. On the broker selection page, enter: "CGFintech", and choose the corresponding server.

5. Select the appropriate server based on your account type:
- **For Demo Accounts:** Choose "**CGFintechHK-Demo**".
  - **For Real Accounts (Cent, ECN, STP):** Choose "**CGFintechHK-Live**".

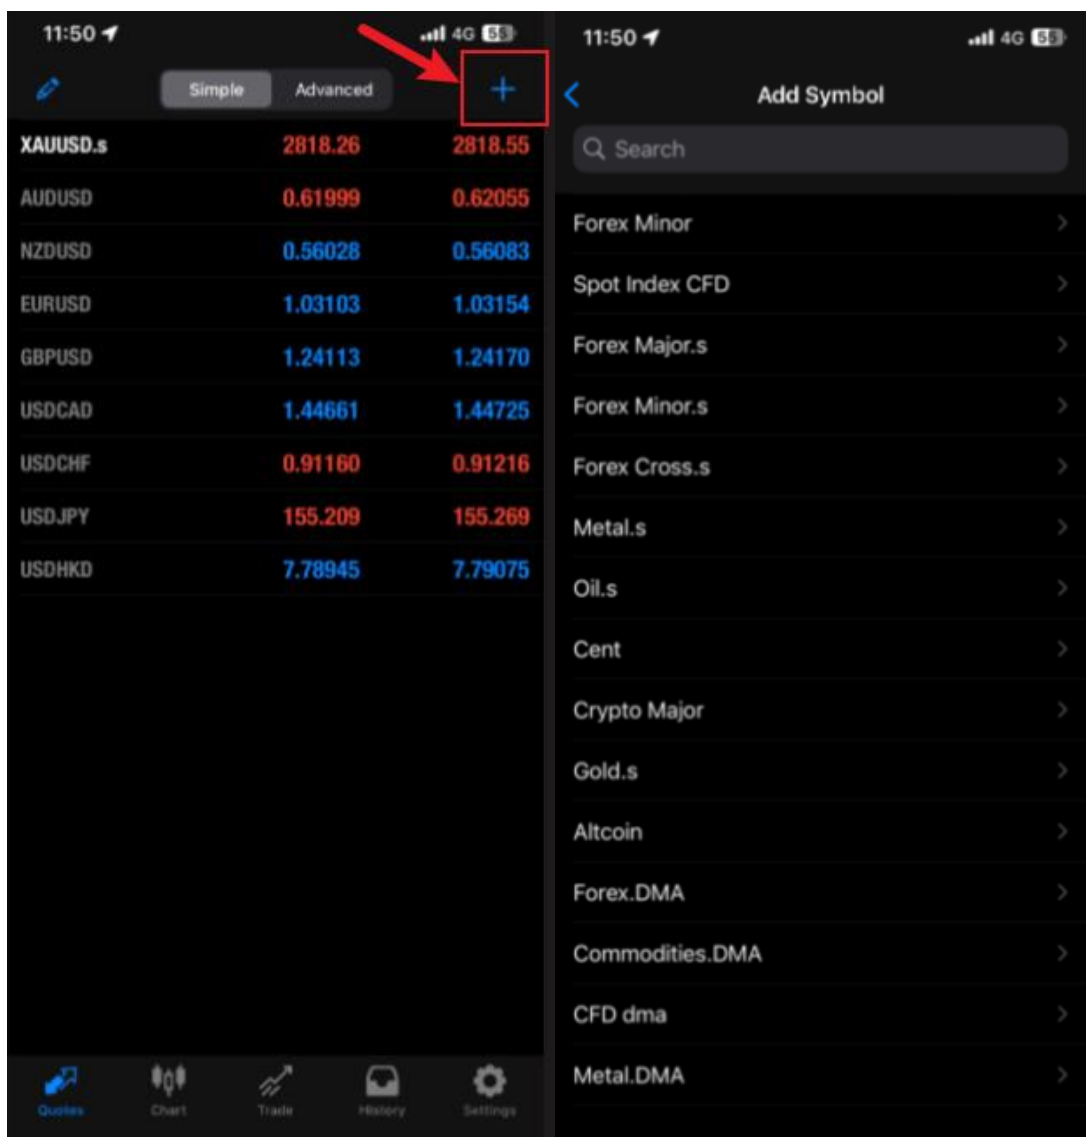

## How to Access Your Account

1. After selecting the correct server, enter your registered trading account number and initial password.
2. Tap "sign in" and you will log in into your account

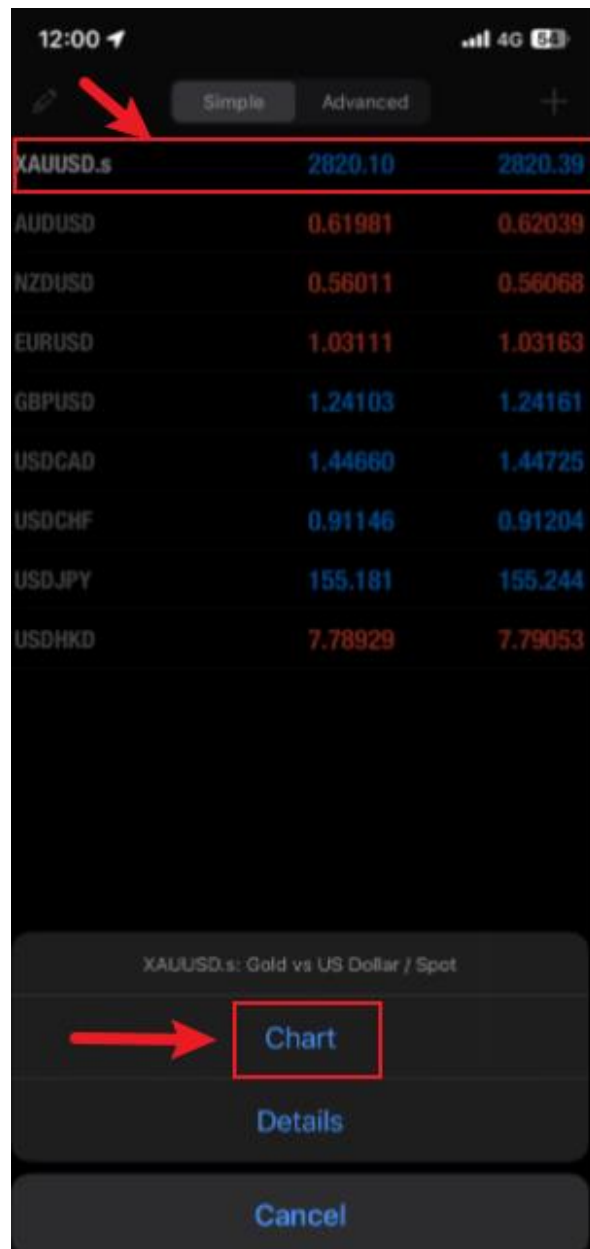

## Navigating the Trading Interface.

1. In the top right corner, tap the "+" icon to add trading instruments.
2. The CG FinTech platform supports **a large selection of currency pairs, precious metals, crude oil**, and more. Add instruments based on your preferences.

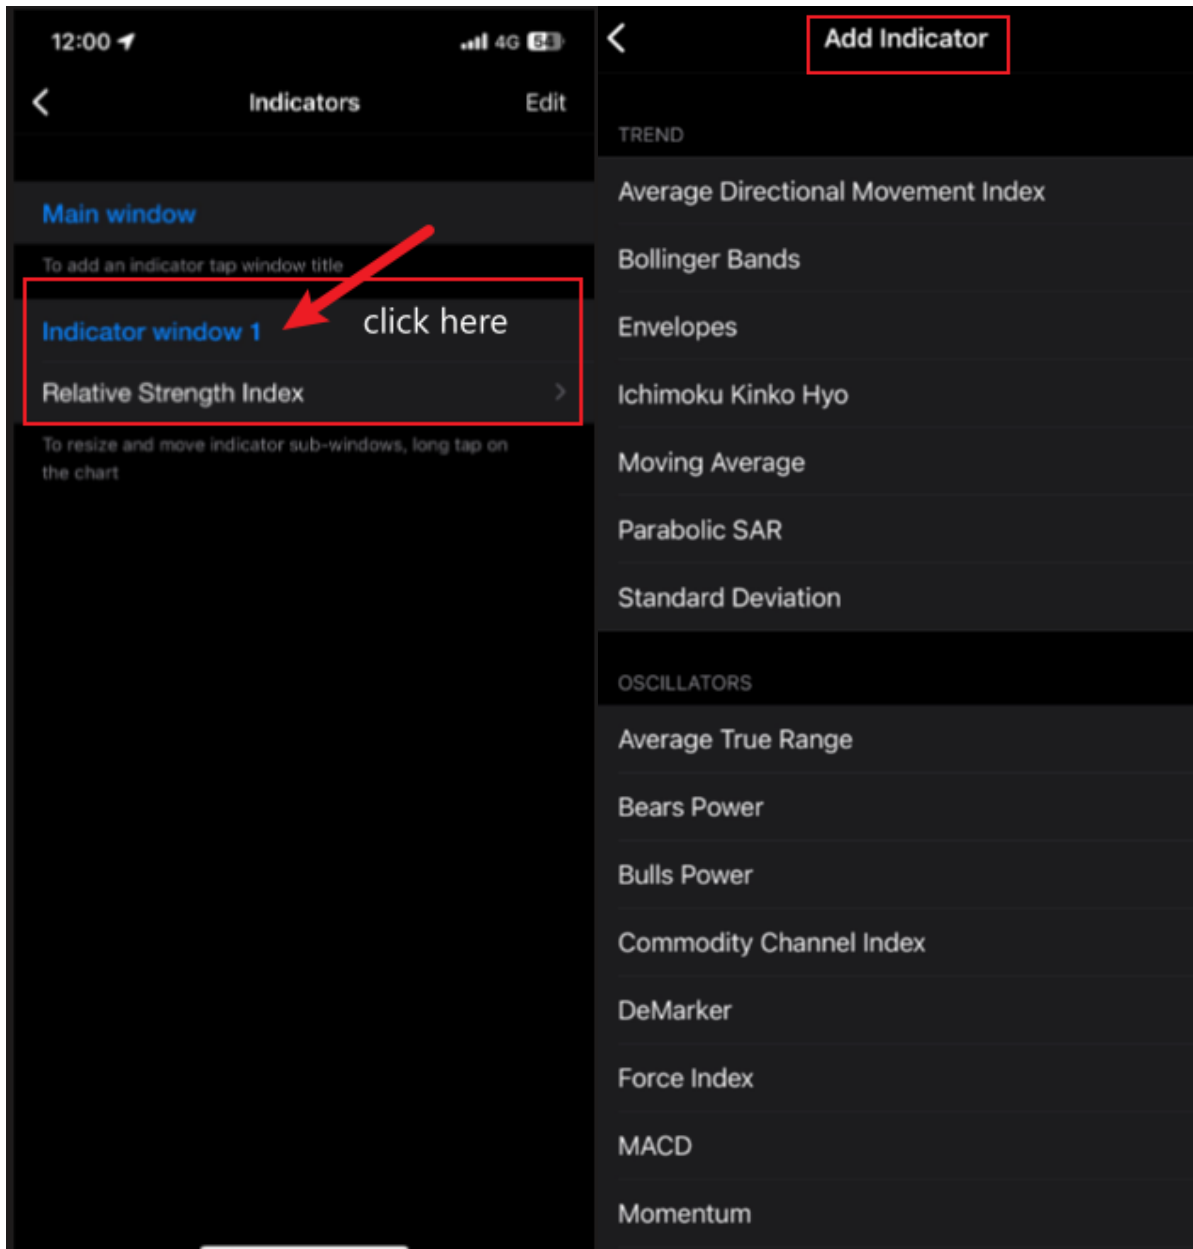

## Adding and Customizing Indicators

1. Select the desired trading instrument (e.g., **XAUUSD - Gold Spot**).
2. A selection window will appear, tap on "chart" button.

3. A chart will appear, click on the "f" indicator button at the top to add technical indicators.

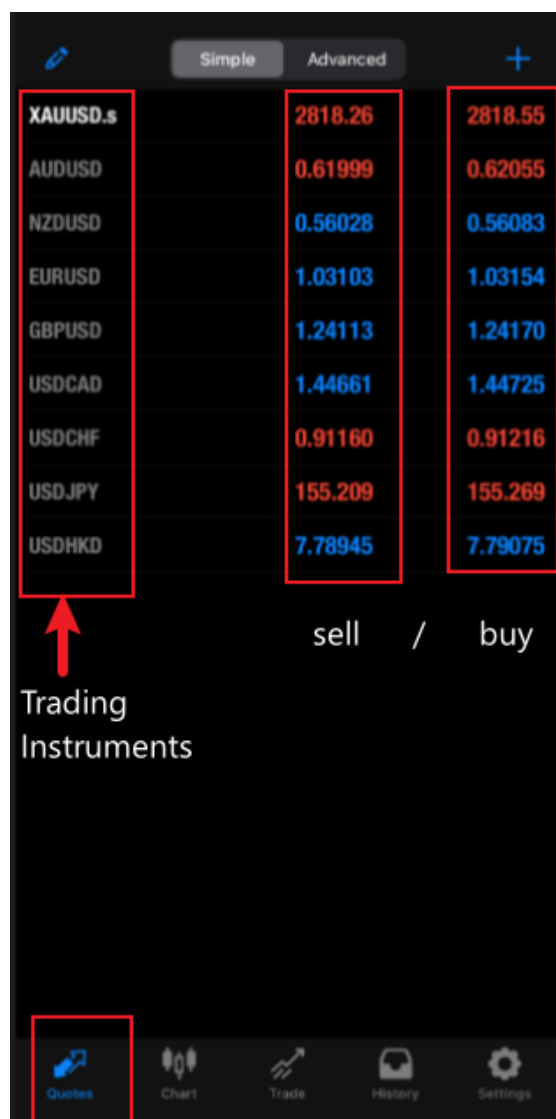

## Placing and Managing Trades

### a) Opening a trade

- Open the MT4 app and navigate to the **Quotes** tab.
- Select the trading instrument you wish to trade and tap on it.

- Tap "**Trade**" to open the order placement screen.

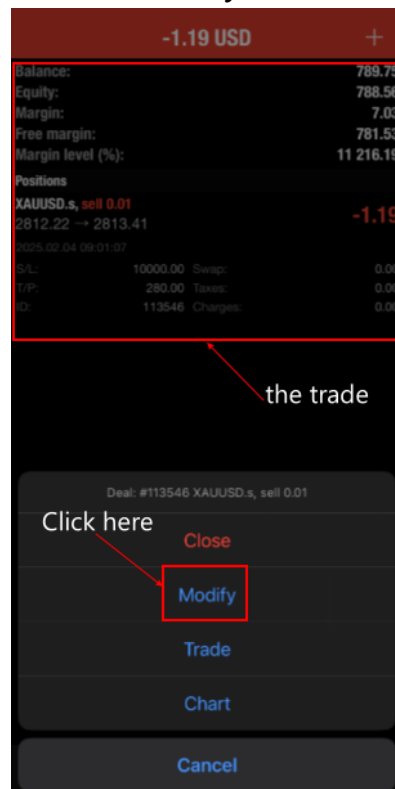

- Enter the **Lot Size** (volume) and set the **Stop Loss (SL)** and **Take Profit (TP)** levels if needed.

- Tap "**Buy**" or "**Sell**" to execute the trade.

b) To modify a trade

- Open the MT4 app and navigate to the **Trade** tab.
- Locate the trade you want to modify

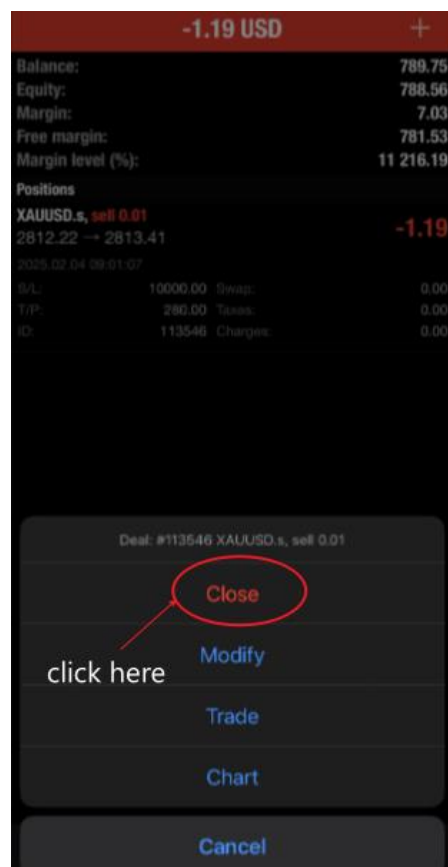

- To **modify** the trade, select "**Modify Order**", adjust SL/TP levels, and confirm changes.

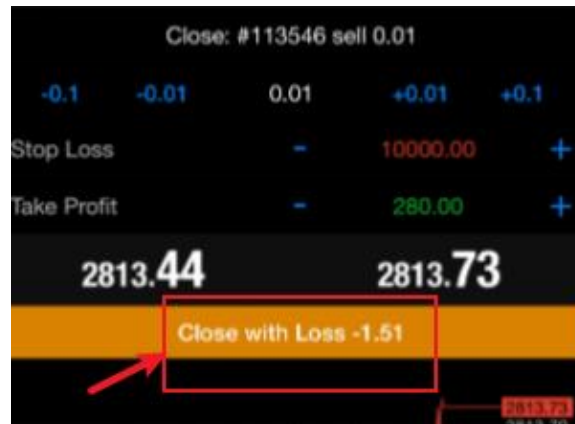

c) To close a trade

- Open the MT4 app and navigate to the **Trade** tab.
- Locate the trade you want to close.

- To **close** the trade, tap "**Close Order**", confirm the action, and the trade will be executed.
